To Whom It May Concern:

This is a letter of recommendation for Mottin Golf Course Renovations. Over the past five years, Doug and his staff have completed a multitude of both small and large scale golf course improvement projects for the Lancaster C.C., in preparation for the 2015 U.S. Women's Open.

Mottin Golf has constructed and renovated several green and tee complexes, re-built many bunkers, completed drainage projects, stabilized eroding stream banks, dredged ponds, installed irrigation and most recently, completed the construction of a new practice putting green and short game facility for our membership. With a variety of different projects and special challenges associated with construction work each year, the one consistency we continue to experience with Mottin Golf, is providing an outstanding end product within budget guidelines and time constraints.

Doug maintains involvement with all of his projects from start to finish and his constant communication between management, architects, consultants and suppliers helps everything move efficiently, while avoiding any unforeseen surprises or delays throughout the entire process. He has also surrounded himself with some talented and knowledgeable people with golf course experience and backgrounds. We have had several different Mottin crews conduct work at LCC over the years and I have been equally impressed by the professionalism, attention to detail, sense of urgency, and respect that they have all shown for both, the golf course and membership as well. This is a testament to Doug and his values.

The Lancaster C.C. is very appreciative of the work that has been completed over the last few years and we would highly recommend Mottin Golf Course Renovations to other facilities and clubs that have a desire to pursue golf course improvements.

Please feel free to contact me at anytime regarding Mottin Golf.

Sincerely,

Todd Bidlespacher  
Director of Golf Course Operations  
Lancaster Country Club
