Dear Mr. Nagy:

First and foremost, it was a true pleasure to work with Mottin Golf Course Renovations, LLC. I am proud that the bunker restoration project, which was the first major restoration project on our golf course in many years, has been completed during my tenure at MGCC. The result, both in playability and appearance is agreed by all to be outstanding. This project gave a fantastic new dimension to this old classic golf course!

The project from start to finish could not have run more smoothly. The daily working relationship between Mottin Golf and our Golf Course Superintendent, Larry Corr and his crew was excellent. The job knowledge and professionalism of Project Manager, Bob Shriver, and his crew were second to none. The crew's sensitivity to the golf course and member play throughout the project was incredibly courteous and unquestionably appreciated.

Doug Mottin was terrific to work with from the bidding process in the initial phases to the continued oversight and communication throughout the project. He assigned a professional, knowledgeable team and fulfilled not only management's expectations, but more importantly the expectations of our membership at MGCC.

We are also extremely gratified that Mottin Golf completed this major project on time *and* within budget, working with us in many areas to stay within our budgeted numbers.

We highly recommend Mottin Golf Course Renovations, LLC and look forward to future business endeavors. If any new or existing client would like a verbal recommendation, please have them call me directly at 215-886-3200 or email me at mdwyer@mg-cc.org.

All the best,

Mary Dwyer, CCM
General Manager
