

11/12/2015

To whom it may concern:

We contracted a complete 18-hole bunker renovation through Mottin Golf in the summer of 2015. They were an absolute pleasure to work with and we would not hesitate to hire them again for future projects. They were able to complete the entire renovation project while keeping the entire golf course open at all times, not closing a single hole at any point.

From the beginning, Doug and Brett were professional, easy to talk with, walked us through the steps of construction, and continually helped as the project was ongoing. They gave plenty of great recommendations in different aspects of the construction, but always let us make the final decision.

The project managers that we had were also fantastic. Kept us informed of their progress at all times and were always able to lay out a weekly plan to help us coordinate golfers around the course.

The ultimate compliment we could give them is that we have already hired them to complete a similar bunker renovation project at our sister property, Atlantic City CC, in the spring of 2016. We are looking forward to another successful project working alongside with Mottin Golf.

Cordially,
