

Sewickley Heights Golf Club
126 Backbone Road
Sewickley, PA 15143

To Whom It May Concern:

We contracted with Mottin Golf Course Renovation in 2012 to complete a Golf Course Renovation Program that included the reconstruction of all of our current bunkers, adding new bunkers, adding low cut chipping areas, and the construction of one new USGA construction greens complex. Additionally, Mottin Golf also installed all of the necessary irrigation for these projects according to our Master Plan Design.

I cannot say enough about the performance and professionalism of the ownership and the staff. The project was a complete success from beginning to end. Communication and the willingness to work with the Club, Architect, Vendors, and our staff ensured that the best interest of the project came first. All work was completed in a professional manor, on schedule, and with attention to detail.

The Club Officials here have the same attitude and are looking forward to future projects with Mottin Golf.

I would highly recommend Mottin Golf for any or all of your construction projects at your facility.

Feel free to contact me at anytime concerning our project and Mottin Golf.

Sincerely,

Travis W. Livingston
