To Whom It May Concern:

This is a letter of recommendation for Mottin Golf Course Renovations. Over the last 5 years Doug & his staff have worked on several projects both large and small at Whitford Country Club. Each project was completed on time, on budget and most importantly has met or exceeded the expectations of the membership. Doug and his staff set a professional tone to each project right from the outset. The time lines for each project were met and his staff found ways to incorporate the various changes the Whitford staff & architects brought to the task at hand.

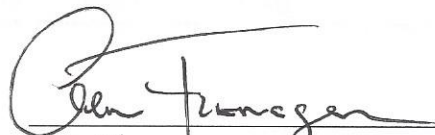

Projects undertaken included the following:

- Total rebuild of 3 greens including new bunkers & green surrounds
- New tee boxes built
- Creek Bed stabilization
- Leveling of teeing areas

Mottin Golf brings a commitment to excellence each day that they come to the golf course. The entire Golf Staff at Whitford Country Club are confident that should a project at your golf club be awarded to Mottin, you will come away with the same positive experience that we had at our club. Should further conversation be required regarding this information, please feel free to contact us for further discussion regarding the folks at Mottin Golf. Thank you for your consideration regarding this fine company.

Mike Ladden, PGA
